Welcome to Smart Learning Academy

Smart Learning Academy is a training academy created for students who want to learn web development and full stack development from the basics.

Our main focus is **practical learning**, real-time examples, coding practice, and project-based training. Students will learn each topic step by step and build confidence by completing mini projects.

Why Choose Us?

- Beginner-friendly teaching
- Live coding practice
- Mini projects after each topic
- Interview-oriented explanations
- Certificate after course completion

Student Achievement Article

From Beginner to Web Developer

Riya Sharma joined Smart Learning Academy as a complete beginner. At first, she was *nervous* about coding, but slowly she became *deeply interested* in web development.

Her trainer told her, “Practice is the strongest way to become confident in coding.”

Learning coding is not about memorizing every tag or concept. It is about understanding the purpose, practicing regularly, making mistakes, correcting them, and building real projects.

Earlier her HTML score was ~~55%~~, but after regular practice, her new score became 92%.

She learned formulas like H₂O and x² + y². The most important topic she enjoyed was **HTML Forms**.

This achievement story is created for HTML text formatting practice.

Academy Details

Training Mode

Online and Offline classes are available.

Course Duration

3 to 6 months depending on the selected course.

Teaching Method

Concept explanation, examples, live coding, tasks, and projects.

Certificate

Certificate will be provided after successful course completion.

Sample Code Display

Student Name : Riya Sharma
Course : Full Stack Development
Goal : Become a Web Developer

Example HTML code:

```
<h1>Welcome to HTML</h1>
```

Gallery

Students attend live classes where each topic is explained clearly with examples.

Students practice coding tasks and mini projects after learning each concept.

Important Note

Reminder: Students must complete all assignments before moving to the next topic.
